EMERGENCY PROCEDURES

An **EMERGENCY** is defined as any situation that occurs involving loading, transporting, or placement of Coal Combustion By-Products (CCP) that is NOT normal, customary, or expected as defined in the Safety Requirements prescribed by the Plant.

Examples of Emergencies include:

- Any accident while hauling a CCP
- Any excessive dusting situation involving a CCP
- Any spill of CCPs in areas not designated for such spill
- Any physical contact with a CCP not recommended by MSDS

In any Emergency situation:

- [Contact us](#) immediately.
- Contact the plant that produced the CCP.
- Contact the customer that ordered the CCP.
- Contact the specific local, state, and federal agencies including;
 - Department of Transportation
 - Environmental Protection Agency
- Contact the Insurance Carrier.
