

## ADDITIONAL INFORMATION

### HAZARDOUS WASTE

Hazardous items such as paint, batteries, oil, and other flammable or toxic substances should never be disposed of in trash, recycling, or organics containers. Businesses can safely dispose of hazardous materials at the Yolo County Landfill as small quantity generators. Visit [yolocounty.org/landfill](http://yolocounty.org/landfill) or call 530-666-8856 for more information.

### CONTAMINATION & OVERAGES

Materials must be properly sorted and fit inside containers with the lids closed. Incorrect sorting or overfilled containers can result in fines for the account holder. Improperly sorted or excess materials pose environmental, service, and safety risks.

### WM ACCOUNT

Save time and access the services you need through your WM account. You can pay bills, report missed pickups, track collections, and more. Go to [wm.com/mywm](http://wm.com/mywm) to register or log into your account.

### HOLIDAY SCHEDULE

WM does not operate on the Fourth of July, Labor Day, Thanksgiving, Christmas, or New Year's Day. Service days that fall on or after a holiday will be delayed by one day the rest of that week. Please plan accordingly to ensure your waste is properly managed during these periods.

## SB 1383 COMPLIANCE

### MANDATORY SERVICE

All California businesses, multifamily complexes, and residences are now required to separate food scraps, food-soiled paper, and yard debris from trash and recycling by subscribing to organics collection. Additionally, businesses must separate recyclables and subscribe to adequate recycling services. To request service or a free assessment, call WM at 530-662-8748.

### EDUCATION & SIGNAGE

Property managers and businesses must educate employees and tenants about waste sorting within 14 days of their hire or move-in date. Ensure indoor trash, recycling, and organics bins are available to all customers and staff and are properly labeled. WM offers training, and signage to assist with compliance.

### KEEPING IT CLEAN

Only BPI-certified compostable bags are accepted in organics carts.

Empty the contents of plastic liners into your recycling bin and place the liner in the trash. Plastic bags and liners are not accepted in recycling or organics.

### SERVICE LEVELS

Right Size your containers and services to avoid overage and contamination charges. Please contact Customer Service for a free waste assessment at (530) 662-8748 or [WoodlandOrganics@wm.com](mailto:WoodlandOrganics@wm.com).

Masks, & PPE

## AVOID OVERAGES & CONTAMINATION

Overflowing or contaminated carts or bins can create hazardous situations, cause messes, and result in additional charges. Please ensure your container lids are fully closed and all materials are sorted correctly. See the tips below to help manage your waste and avoid charges.

### Train, Educate & Monitor

Training and educating employees or tenants on proper sorting is the best way to prevent overage and contamination charges. Contact WM at 530-406-4330 to request educational materials or schedule a free training session with our Recycling Coordinators.

### Sort Properly

Place only accepted recycling and organic materials in the corresponding containers. Printable signs are available at [cityofwoodland.gov/SB1383](http://cityofwoodland.gov/SB1383) to post on or above indoor bins reinforcing proper sorting behavior. Assign staff to monitor and remove any improper materials from each bin to prevent contamination.

### Manage Cardboard

Always break down cardboard boxes to save space in your recycling container. Wet or waxed cardboard boxes can be placed in your organics bin as long as all tape and stickers are removed.

### Manage Bulky Materials

Keep materials such as pallets, furniture, and appliances out of your dumpster. Multifamily properties can get one free roll-off for bulky materials per year for their tenants by calling 530-406-4330. Other commercial businesses may order a roll-off for bulky waste at 530-662-8748.

### Anticipate Service Changes

Before large events, clean-outs, or busy seasons, consider calling WM to request more frequent service, larger containers, or one-time extra pickups.
